DESIGNS

PURPOSE-DRIVEN PRODUCTS

PROJECT: Seattle Based National Law Firm

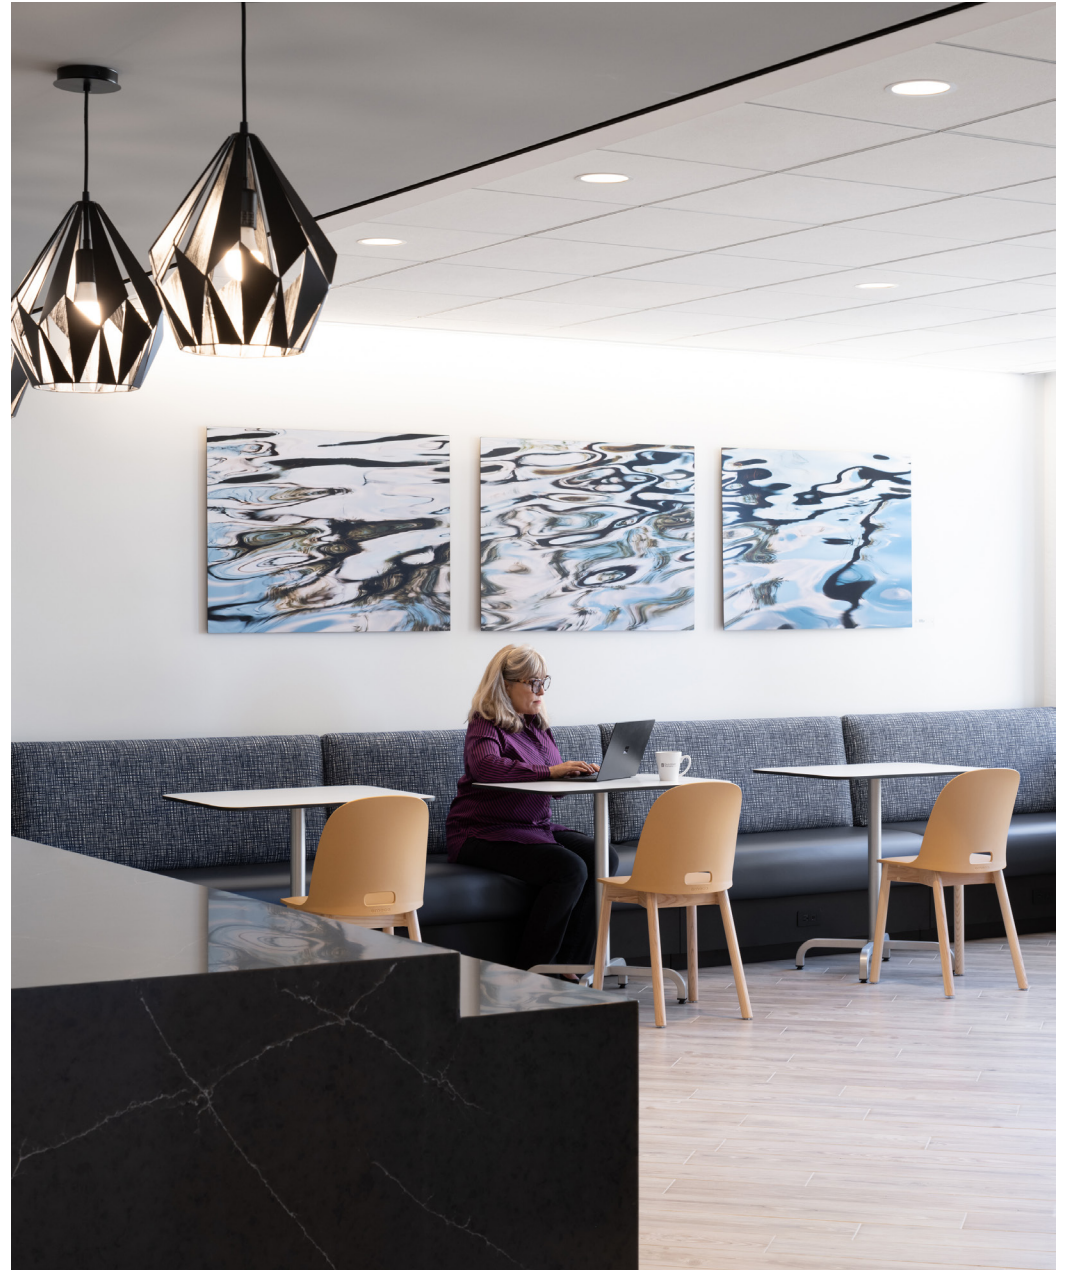

LOCATION: San Francisco, California

DESIGN: Lisa Bottom Design, Inc., Coriander Designs

OVERVIEW: Collaborative and productive. These ideas were the central focus for the law firm's new San Francisco home. Efficient layouts integrated with technological solutions conducive to in-office and remote users was essential for the firm's employees and clients. Bright, inviting communal spaces were also key to encourage a comfortable experience to support the creative work for which the firm is known.

Our experience working on the firm's Seattle and DC offices and our extensive custom capabilities afforded the project team the confidence they required in a furniture manufacturer. We created a suite of purpose-driven products including adjustable height workstations with storage for open and private offices, a custom conference table with integrated data for hybrid meetings, and a custom curved banquette with attached planter serving as a warm welcome to visitors.

Architect of Record:	AECOM
