Pacific NW Urban Design

We are a creative alternative to the conventional commercial furniture industry. In our Woodinville, WA factory, we design and build our furniture using the same philosophies we've been committed to since opening our doors in 1979 - high-quality standards and dedication to our clients. We are an innovative domestic manufacturer with an extensive product line featuring a unique Northwest Urban Design Aesthetic. Over the years, we have become the go-to-partner of Architects, Designers, and Furniture Dealers who are developing unique environments for many of the world's most innovative companies. From lobbies to conference rooms, hybrid offices to collaborative breakout spaces, and everything in between, Coriander Designs is your partner for elevated design.

QUALITY

We are proud to manufacture all our products in America. Since 1979, our commitment to keeping all production in the USA has resulted in a smaller eco-footprint, local job creation and long term manufacturing stability. Our 44,000 square foot factory in Woodinville, Washington is fully equipped to handle all our clients' needs efficiently and effectively. With total control over our materials and all of our labor force working together under one roof, we are confident that all the products that leave our factory floor are made with the highest quality and built to last.

FUNCTIONALITY

Nearly all our products are offered a multitude of standard size and configuration options to meet your individual needs. Each product page provides a curated selection of the finishes, materials and data units available to make specification - and customization - simple. We can also implement custom options like height adjustable functionality, non-standard finishes, materials, and power modules for most of our products to ensure you get all the form and functionality you require for your space.

SAFETY

We understand the importance of maintaining a safe environment so we offer several options to keep visitors and employees safe. Solid Surface is a nonporous, chemical and stain resistant surface that does not support the growth of bacteria. It can be bonded to many of our chair arm caps, creating a seamless transition from wood arms. Micoban antimicrobial protection can be added to our wood finish to inhibit the growth of stain and odor-causing bacteria 24/7. Our High Pressure Laminates offer an antibacterial surface through the use of silver phosphate glass that reduces the number of bacteria on the surface.

SUSTAINABILITY

We are an FSC® certified shop and can offer FSC-certified products. We practice preferable product manufacturing - using products or services that have a reduced effect on human health and the environment when compared with competing products. Our lumber is FAS Select Grade and locally and responsibly harvested. All our foam is CFC free and recyclable. We offer many fabric choices that are natural or made using reconstituted material. Our varnish is VOC compliant and free of Lead and Chomate. Additionally, we are able to follow through on LEED requirements should your project request or require certification.

The mark of responsible forestry
