Elevated Care

Our extensive experience designing furniture to meet customer aspirations while maintaining the fundamentals of holistic care is simply and effectively achieved. Any standard or custom product can be manipulated to meet a project's precise requirements, be they fire retardants, non-ferrous fasteners, increased weight capabilities, elevated seats, moisture barriers, UV inhibitors and bleach cleanable finishes. We also offer anti-microbial solid surface options that can be bonded to arm caps and used as surfaces for any of our tables or counter tops to ensure a sterile, safe and beautiful environment. From reception areas to on-call rooms, Coriander Designs is your partner for elevated care.

In-Room Solutions

We believe in the “creation of an environment” within healthcare facilities - taking great pride in creating spaces that offer flexibility, versatility, space-saving and clean-ability. To that end, we’ve worked with designers and facility managers to create custom and standard solutions for in-room care for patients, physicians and staff.

QUALITY

We are proud to manufacture all our products in America. Since 1979, our commitment to keeping all production in the USA has resulted in a smaller eco-footprint, local job creation and long term manufacturing stability. Our 44,000 square foot factory in Woodinville, Washington is fully equipped to handle all our clients' needs efficiently and effectively. With total control over our materials and all of our labor force working together under one roof, we are confident that all the products that leave our factory floor are made with the highest quality and built to last.

FUNCTIONALITY

As with most of our products, our case good collections offer a multitude of size and configuration options. All three collections can be personalized with one of our 17 standard finishes and 9 edge profiles. Each collection also offers additional free-standing storage options. We can also implement height adjustable functionality and integrated data units for comfort and connectivity all at reach. Custom options are also available.

SAFETY

We understand the importance of maintaining a sterile environment in the healthcare environment so we offer several options to keep patients and staff safe. Solid Surface is a nonporous, chemical and stain resistant surface that does not support the growth of bacteria. It can be bonded to many of our chair arm caps, creating a seamless transition on wood arms. Micoban antimicrobial protection can be added to our wood finish to inhibit the growth of stain and odor-causing bacteria 24/7. Our High Pressure Laminates offer an antibacterial surface through the use of silver phosphate glass that reduces the number of bacteria on the surface.

SUSTAINABILITY

We are an FSC® certified shop and can offer FSC-certified products. We practice preferable product manufacturing - using products or services that have a reduced effect on human health and the environment when compared with competing products. Our lumber is FAS Select Grade and locally and responsibly harvested. All our foam is CFC free and recyclable. We offer many fabric choices that are natural or made using reconstituted material. Our varnish is VOC compliant and free of Lead and Chomate. Additionally, we are able to follow through on LEED requirements should your project request or require certification.

The mark of responsible forestry
