

# Care and Maintenance

## Veneer or Laminate Products

Clean using a clean water-dampened cloth, wiping with the direction of the grain. Avoid: harsh commercial cleaning solvents that include wax, or silicon. These chemicals can penetrate the finish and alter the appearance over time. Coriander Design's finish is approved for up to a 10 to 1 Water/Bleach solution. Clean up spills immediately.

Glass or desk pads will eliminate the impact of writing instruments. Use felt or cork pads on the bottom of contact points of accessory items, like computers, phones, lamps, etc. The rubber/plastic feet of accessory items can react adversely with the finish. This is not a warranty item. Do not place hot cups/boxes directly on the surface of your furniture. The heat can cause the finish to cloud before the finish is fully cured.

## Leveling is important

For longest life, correct drawer/ door alignment, requires casegoods to be properly leveled. If the furniture is not properly leveled, extra pressure will be put on joints and mechanisms that are not intended to carry the burden and can result in shortened life of the product.

## Finish Disclaimer

Wood is a natural product. Coriander does not guarantee exact colors due to differences in grain, and texture or differences in wood species. Minor variations are to be expected. Some desktop accessories with plastic or rubber feet can penetrate or burn the finish. This is not a defect in the finish. Also, finishes, when exposed to ultraviolet rays, may change color. These color changes are not a defect in the finish and are to be expected.
