Elevated Design

Our extensive experience designing furniture to meet customer aspirations while maintaining the fundamentals of holistic care is simply and effectively achieved. Any standard or custom product can be manipulated to meet a project's precise requirements, be they fire retardants, non-ferrous fasteners, increased weight capabilities, elevated seats, moisture barriers, UV inhibitors and bleach cleanable finishes. We also offer anti-microbial solid surface options that can be bonded to arm caps and used as surfaces for any of our tables or counter tops to ensure a sterile, safe and beautiful environment. From lobbies to conference rooms, Coriander Designs is your partner for elevated design.

Innovative Solutions

A fusion of classic craftsmanship with state of the art machinery sets Coriander Designs among the leaders in the industry. With our extensive product offering and unlimited customized capabilities, we can provide styles, sizes and options to accommodate any environment. Our collaborative process with designers, distribution partners and end users ensures that we meet the comfort, durability and aesthetic needs of our clients. No idea is too large; no project is too detailed.

QUALITY

We are proud to manufacture all our products in America. Since 1979, our commitment to keeping all production in the USA has resulted in a smaller eco-footprint, local job creation and long term manufacturing stability. Our 44,000 square foot factory in Woodinville, Washington is fully equipped to handle all our clients' needs efficiently and effectively. With total control over our materials and all of our labor force working together under one roof, we are confident that all the products that leave our factory floor are made with the highest quality and built to last.

FUNCTIONALITY

As with most of our products, our cafe table collections offer a multitude of size and configuration options. All the tables shown can be personalized with any of our offered material and finish and 2 edge profiles. We can also implement height adjustable functionality, where available, casters, and integrated data units for comfort and connectivity all at reach. Custom options are also available. Reach out to one of our sales representatives to learn more about our extensive capabilities.

SAFETY

We understand the importance of maintaining a safe environment so we offer several options to keep visitors and employees safe. Solid Surface is a nonporous, chemical and stain resistant surface that does not support the growth of bacteria. It can be bonded to many of our table tops, creating a seamless transition from the wood. Micoban antimicrobial protection can be added to our wood finish to inhibit the growth of stain and odor-causing bacteria 24/7. Our High Pressure Laminates offer an anti-bacterial surface through the use of silver phosphate glass that reduces the number of bacteria on the surface.

SUSTAINABILITY

Coriander Designs practices preferable product manufacturing in that we use products or services that have a reduced effect on human health and the environment when compared with competing products or services that serve the same purpose. Our lumber is FAS Select Grade and locally and responsibly harvested. We can also offer FSC® wood tops when requested. Our varnish is VOC compliant and free of Lead and Chomate. Additionally, we are able to follow through on LEED requirements should your project request or require certification.
