Standard 2week Quick Ship Tops

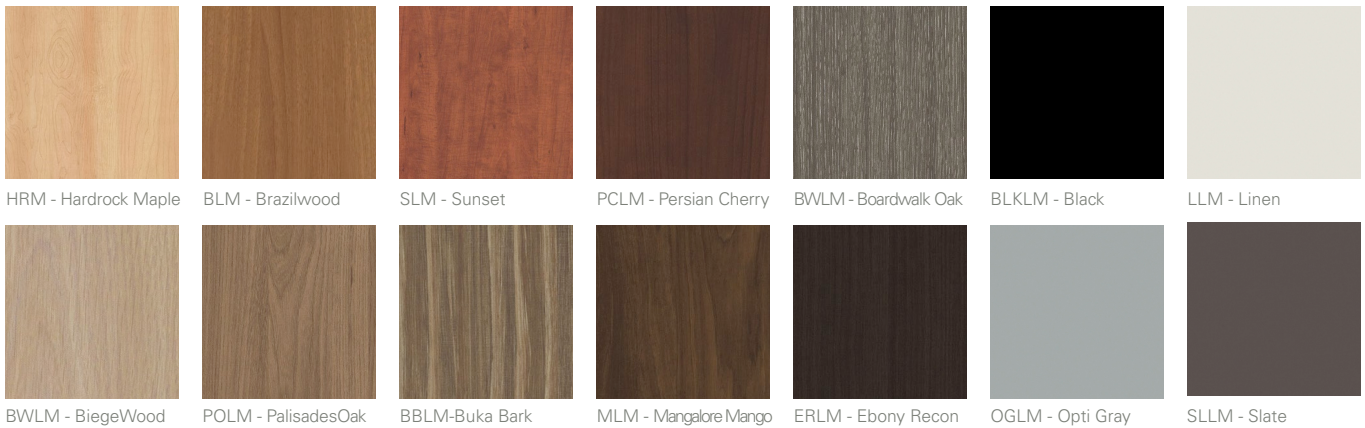

Please Specify Size and Finish When Ordering

The perfect premium High Pressure Laminate Tops ready in two weeks. For use with your height adjustable bases, as a work surface or on top of lateral files. Available in 14 standard laminate finishes with matching 3mm PVC Edge Band.

Our plastic laminate tops are 1 1/4" thick, 45 lb density, industrial grade particle board; .048 thick high pressure laminate with a .020 thick phenolic balancing sheet, cold pressed under high pressure using a polyvinyl acetate polymer adhesive.

Laminate Finishes with matching 3mm Edgebanding

P-15 Power Module with Cable Basket

P-15 provides a convenient way to hide power, data, and USB below the work surface while also providing users easy access when needed. A lift open grommet lid installed in the table surface conceals all power and cabling components when closed. The cable basket is easily mounted to the underside of the surface and provides ample space to store cabling and large laptop accessories beneath the work surface. Built in openings for telecom plates and cable pass through holes in the basket accommodate a variety of data options. Available in Silver, Black, and Gloss White powder coat or Clear Brushed Aluminum with 3 power and two powered USB plug-ins.
