

Sling Seating Specifications

Sling chair frames are hand-shaped from the finest quality, FAS Grade Lumber available. All frame are assembled using the sleek joinery is inspired by Danish and Scandinavian design. All from solid American hardwoods, and are available in Natural Walnut, White Ash, or Charcoal Ash.

Slung with high quality, comfortable, hand-stitched leather, this chair will make a statement in any room.

For the Sling Chair finish use a hardy, plant based, VOC-free finish on our products; a hand rubbed hard-wax finish. After an initial water-pop, we do a final light sand, followed by a cleaning product. The first finish coat is then hand-rubbed into the wood, and excess is wiped off. A second coat is applied after a period of time, and finally a maintenance oil is topcoat to get a perfect satin sheen. This final maintenance oil can be re-applied as needed to refresh the furniture, but is not required.
