

Tripod Occasional Table Specifications

Tripod Occasional Tables are hand-shaped from the finest quality, FAS Grade Lumber available. All frames are assembled using the sleek joinery inspired by Danish and Scandinavian design. All from solid American hardwoods, and available in Natural Walnut, White Ash, or Charcoal Ash.

For the Tripod Occasional Table, we use a hardy, plant based, VOC-free finish on our products; a hand rubbed hard-wax finish. After an initial water-pop, we do a final light sand, followed by a cleaning product. The first finish coat is then hand-rubbed into the wood, and the excess is wiped off. A second coat is applied after a period of time, and finally a maintenance oil topcoat is applied to get a perfect satin sheen. This final maintenance oil can be re-applied as needed to refresh the furniture, but is not required.
